

Table of Contents : Internet Technology	
Week2	Session Details
Day 1	<ul style="list-style-type: none"> ▪ What Is the Microsoft .NET Platform? ▪ What is the .NET Framework? ▪ What are the .NET Framework Components? ▪ What Are the Visual Basic .NET Enhancements? ▪ Describing the Integrated Development Environment ▪ Creating Visual Basic .NET Projects ▪ Using Development Environment Features ▪ Debugging Applications § Compiling in Visual Basic .NET ▪ Data Types ▪ Using Variables ▪ Functions, Subroutines, and Properties ▪ Exception Handling
Day 2	<ul style="list-style-type: none"> ▪ Designing Classes ▪ Object-Oriented Programming Concepts ▪ Using Microsoft Visio® ▪ Defining Classes ▪ Creating and Destroying Objects ▪ Inheritance ▪ Interfaces ▪ Working with Classes ▪ Why Use Windows Forms? ▪ Structure of Windows Forms ▪ Using Windows Forms ▪ Using Controls ▪ Windows Forms Inheritance
Day 3	<ul style="list-style-type: none"> ▪ Introduction to ASP.NET ▪ Creating Web Form Applications ▪ Building Web Services ▪ Using Web Services ▪ ADO.NET Overview ▪ .NET Data Providers ▪ The DataSet Object ▪ Data Designers and Data Binding ▪ XML Integration ▪ Components Overview ▪ Creating Serviced Components ▪ Creating Component Classes ▪ Creating Windows Forms Controls ▪ Creating Web Forms User Controls ▪ Threading

Day 4	<ul style="list-style-type: none"> ▪ Describing Assemblies ▪ Choosing a Deployment Strategy ▪ Deploying Applications ▪ Using .NET and COM Components in a Windows Forms Application ▪ Calling Win32 APIs from Windows Forms Applications ▪ Upgrading Visual Basic 6.0 Applications to Visual Basic .NET ▪ Printing From a Windows Forms Application ▪ Using the Print Preview, Page Setup, and Print Dialogs ▪ Constructing Print Document Content by Using GDI+ ▪ Creating Reports by Using Crystal Reports
Day 5	<ul style="list-style-type: none"> ▪ The .NET Asynchronous Programming Model ▪ The Asynchronous Programming Model Design Pattern ▪ How to Make Asynchronous Calls to Any Method ▪ Helping to Protect State and Data in a Multithreaded Environment ▪ Adding Accessibility Features ▪ Adding Help to an Application ▪ Localizing an Application ▪ Deciding Whether to Upgrade ▪ Options for Upgrading ▪ Recommendations ▪ Performing the Upgrade
Day 6	Catch up and Review Test and Evaluation
Week 3	
Day 7	<ul style="list-style-type: none"> ▪ Introduction to the .NET Framework ▪ Overview of ASP.NET ▪ Overview of the Lab Application ▪ Resources ▪ Overview of Visual Studio .NET ▪ Creating an ASP.NET Web Application Project ▪ Overview of the .NET-Based Languages ▪ Comparison of the .NET-Based Languages ▪ Creating a Component Using Visual Studio .NET
Day 8	<ul style="list-style-type: none"> ▪ Creating Web Forms ▪ Using Server Controls ▪ Using Code-Behind Pages ▪ Adding Event Procedures to Web Server Controls ▪ Using Page Events ▪ Understanding Tracing ▪ Remote Debugging ▪ Overview of User Input Validation ▪ Using Validation Controls ▪ Page Validation

Day 9	<ul style="list-style-type: none"> ▪ Adding User Controls to an ASP.NET Web Form ▪ Creating User Controls ▪ Creating a Connection to the Database ▪ Displaying a DataSet in a List-Bound Control ▪ Connecting to a Database ▪ Accessing Data with DataSets ▪ Using Multiple Tables ▪ Accessing Data with DataReaders
Day 10	<ul style="list-style-type: none"> ▪ Overview of Stored Procedures ▪ Calling Stored Procedures ▪ Overview of XML Architecture in ASP.NET ▪ XML and the DataSet Object ▪ Working with XML Data ▪ Using the XML Web Server Control ▪ Overview of Using XML Web Services ▪ Calling an XML Web Service by HTTP ▪ Using a Proxy to Call an XML Web Service ▪ Creating an XML Web Service
Day 11	<ul style="list-style-type: none"> ▪ State management ▪ Application and Session Variables ▪ Cookies and Cookieless Sessions ▪ Using the Cache Object ▪ Using ASP.NET Output Caching ▪ Configuring an ASP.NET Web Application ▪ Deploying an ASP.NET Web Application ▪ Web Application Security Overview ▪ Working with Windows-Based Authentication ▪ Working with Forms-Based Authentication ▪ Overview of Microsoft Passport Authentication
Day 12	Catch up and Review Test and Evaluation.
Week 4	
Day 13	<ul style="list-style-type: none"> ▪ Understanding the Fundamentals of a C# Program ▪ Using C# Predefined Types ▪ Writing Expressions ▪ Creating Conditional Statements ▪ Creating Iteration Statements ▪ Defining a Class ▪ Declaring Methods ▪ Using Constructors ▪ Using Static Class Members
Day 14	<ul style="list-style-type: none"> ▪ Designing Objects ▪ Using Inheritance ▪ Using Polymorphism ▪ Using Arrays ▪ Using Collections ▪ Using Interfaces

	<ul style="list-style-type: none"> ▪ Using Exception Handling ▪ Using Delegates and Events
Day 15	<ul style="list-style-type: none"> ▪ Examining the .NET Framework Class Library ▪ Overriding Methods from System.Object ▪ Formatting Strings and Numbers ▪ Using Streams and Files ▪ Creating an Application That Uses ADO.NET to Access Data ▪ Changing Database Records
Day 16	<ul style="list-style-type: none"> ▪ Creating the Main Menu ▪ Creating and Using Common Dialog Boxes ▪ Creating and Using Custom Dialog Boxes ▪ Creating and Using Toolbars ▪ Creating the Status Bar ▪ Creating and Using Combo Boxes ▪ Role Based Security
Day 17	<ul style="list-style-type: none"> ▪ Working with Application Settings ▪ Deploying Applications§ Exploring Additional Features of C# ▪ Communication between VB .NET client and VC# server and vice versa
Day 18	Catch up and Review Test and Evaluation.
Week 5	
Day 19	<ul style="list-style-type: none"> ▪ Over view of IO Streams ▪ Using different Streams ▪ Serializing Objects ▪ Using the File Class ▪ Random Access File ▪ Reader and Writer class ▪ Collections ▪ Array Lists ▪ Vectors ▪ Hash Table ▪ Enumeration
Day 20	<ul style="list-style-type: none"> ▪ Swing Containers I: The Heavyweights ▪ Swing Components§ Event Handling ▪ Menus & ToolBars§ Common Dialogs ▪ Borders ▪ Project PHASE I- UI Tier ▪ Creating Threads ▪ Thread Scheduling ▪ Thread Synchronization

Day 21	<ul style="list-style-type: none"> ▪ Revision of RDBMS Concepts ▪ Data Modeling§ Normalization (Using Oracle) ▪ SQL ▪ PL/SQL ▪ Data Definition Language ▪ DML ▪ Joins , SubQueries ▪ Procedures and functions
Day 22	<ul style="list-style-type: none"> ▪ Working with JDBC 2.0 ▪ The JDBC architectureConnecting to ODBC data sources ▪ The JDBC APIConnection of Java to Database ▪ The JDBC 2.0 APICalling Stored Procedures ▪ Transactions- Commit & Rollback ▪ Need of connection Pooling ▪ Project PHASE II : Adding the data tier
Day 23	<p style="text-align: center;">(Using Websphere)</p> <ul style="list-style-type: none"> ▪ Walkthrough Java APIs that make up the ▪ J2EE standardDeveloping to a tiered application modelDefining a J2EE application, J2EE modulesand J2EE components ▪ Configuration of J2EE ServerWeb Clients and Components ▪ J2EE application server installation ▪ Web Application Archives(WAR)Creating / Managing WAR FilesApplication-Level Configuration
Day 24	<ul style="list-style-type: none"> ▪ XML ▪ Introduction§ Writing XML ▪ DTD (Document Type Definition) fundamentals ▪ XML Schema ▪ Usage of XML in Configuration
Week 6	
Day 25	<ul style="list-style-type: none"> ▪ XML for Business Data ▪ Other Uses of XML ▪ XML Standards & Formats ▪ XML PARSERS-SAX and DOM
Day 26	<ul style="list-style-type: none"> ▪ Introduction to design patterns and architectures ▪ Pattern ▪ Architectural Patterns ▪ Pattern Idioms ▪ Pattern Systems ▪ MVC ▪ Test, Debug Deploy

Day 27	<ul style="list-style-type: none"> ▪ Java Servlet Technology ▪ Servlet FundamentalsService / Request / Response Methods ▪ Multithreaded model of Servlets ▪ Why use Servlets?
Day 28	<ul style="list-style-type: none"> ▪ The structure of a Servlet API Lifecycle of a Servlet ▪ Get Vs POST ▪ ServletConfig & init params
Day 29	<ul style="list-style-type: none"> ▪ State management§ Cookies ▪ Disadvantages of Cookies ▪ What are session variables, session id ▪ Why URL Rewriting
Day 30	<ul style="list-style-type: none"> ▪ Session Management ▪ Single Thread InterfaceInter-Servlet Communication ▪ Coding & Debugging Servlets ▪ Filters
Week 7	
Day 31	<ul style="list-style-type: none"> ▪ Java Server PagesJSP Execution Engine ▪ Why JSP? ▪ JSP tags ▪ Database Access with JSP
Day 32	<ul style="list-style-type: none"> ▪ JSP using Bean Components ▪ Session & Application Objects in JSP
Day 33	<ul style="list-style-type: none"> ▪ Custom tags in JSP ▪ Coding & debugging JSPs ▪ Writing Maintainable JSP pages
Day 34	<ul style="list-style-type: none"> ▪ Project PHASE : Adding support for HTTP
Day 35	<ul style="list-style-type: none"> ▪ Enterprise Beans EJB FundamentalsWhy EJB ▪ Remote Vs Local Interface ▪ Why Home interface ▪ Instance pooling ▪ Types of Beans. Comparison
Day 36	<ul style="list-style-type: none"> ▪ Session Beans ▪ Stateless Vs Stateful ▪ Home Interface, Remote Interface of Session Bean ▪ Session Bean InterfaceDeployment ▪ Developing Servlet as a client for Session Bean

Week 8	
Day 37	<ul style="list-style-type: none"> ▪ Entity Beans ▪ CMP Vs BMP ▪ Home Interface, Remote Interface of Entity Bean ▪ Entity Bean Interface ▪ Deployment ▪ Developing Servlet as a client for Entity Bean ▪ Message-Driven Bean ▪ Why Message Driven Bean
Day 38	<ul style="list-style-type: none"> ▪ Jakarta Struts 1.2 ▪ Overview and Motivation ▪ Setting up and Configuring Struts ▪ Processing Requests with Action Objects
Day 39	<ul style="list-style-type: none"> ▪ Handling Exceptions Declaratively ▪ Validating User Input Manually ▪ Using the Automatic Validation Framework ▪ Using JSTL with Struts ▪ Composing Pages with Tiles
Day 40	<ul style="list-style-type: none"> ▪ Principles of Object Relational Mapping ▪ Hibernate configuration ▪ HQL ▪ Making objects persistent ▪ Hibernate semantics
Day 41	<ul style="list-style-type: none"> ▪ Object mapping ▪ Mapping simple properties ▪ Single-valued associations ▪ Multi-valued associations ▪ Bi-directional associations ▪ Indexed collections
Day 42	<ul style="list-style-type: none"> ▪ SOAP concepts ▪ SOAP request ▪ Structure of SOAP Message ▪ SOAP response ▪ SOAP header ▪ Datatypes ▪ Passing Objects ▪ SOAP Faults ▪ Attachments
